

# PROCEEDINGS

OF THE

## ROYAL SOCIETY OF EDINBURGH.

SESSION 1907-8.

Part V.]

VOL. XXVIII.

[Pp. 337-432.

### CONTENTS.

NO.		PAGE
XIX.	A Preliminary Notice of Five New Species of Iron-Bacteria. By DAVID ELLIS, Ph.D. (Marburg), D.Sc. (London), F.R.S.E., Lecturer in Botany and Bacteriology, Glasgow and West of Scotland Technical College, Glasgow. With Three Plates, . . . . .	338
	<i>(Issued separately June 13, 1908.)</i>	
XX.	The Arterial Pressure in Man. I.: Methods. By G. A. GIBSON, M.D., D.Sc., LL.D., F.R.C.P.Ed. . . . .	343
	<i>(Issued separately June 22, 1908.)</i>	
XXI.	Preliminary Statement on the Morphology of the Cone of <i>Lycopodium cernuum</i> and its bearing on the affinities of <i>Spencerites</i> . By WILLIAM H. LANG, M.B., D.Sc., Lecturer in Botany, Glasgow University. ( <i>Communicated by Professor F. O. BOWER, Sc.D., F.R.S.L. and E.</i> ), . . . . .	356
	<i>(Issued separately June 22, 1908.)</i>	
XXII.	Note on the Electrical Resistance of Spark Gaps. By ROBERT A. HOUSTOUN, Ph.D., D.Sc. ( <i>Communicated by Professor A. GRAY, F.R.S.</i> ), . . . . .	369
	<i>(Issued separately July 20, 1908.)</i>

REGULATIONS REGARDING THE PUBLICATION OF PAPERS  
IN THE PROCEEDINGS AND TRANSACTIONS OF THE  
SOCIETY.

THE Council beg to direct the attention of authors of communications to the Society to the following Regulations, which have been drawn up in order to accelerate the publication of the Proceedings and Transactions, and to utilise as widely and as fairly as possible the funds which the Society devotes to the publication of Scientific and Literary Researches.

1. MANUSCRIPT OF PAPERS.—As soon as any paper has been passed for publication, either in its original or in any altered form, and has been made ready for publication by the author, it is sent to the printer, whether it has been read or not.

The 'copy' should be written on large sheets of paper, on one side only, and the pages should be clearly numbered. The MS. must be easily legible, preferably typewritten, and must be absolutely in its final form for printing; so that corrections in proof shall be as few as possible, and shall not cause overrunning in the lines or pages of the proof. All tables of contents, references to plates, or illustrations in the text, etc., must be in their proper places, with the page numbers left blank; and spaces must be indicated for the insertion of illustrations that are to appear in the text.

2. ILLUSTRATIONS.—All illustrations must be drawn in a form immediately suitable for reproduction; and such illustrations as can be reproduced by photographic processes should, so far as possible, be preferred. Drawings to be reproduced as line blocks should be made with Indian ink (deadened with yellow if of bluish tone), preferably on fine white bristol board, free from folds or creases; smooth, clean lines, or sharp dots, but no washes or colours, should be used. If the drawings are done on a large scale, to be afterwards reduced by photography, any lettering or other legend must be on a corresponding scale.

If an author finds it inconvenient to furnish such drawings, the Society will have the figures re-drawn at his expense; but this will cause delay.

When the illustrations are to form plates, a scheme for the arrangement of the figures (in quarto plates for the Transactions, in octavo for the Proceedings) must be given, and numbering and lettering indicated.

3. PROOFS.—In general, a first proof and a revise of each paper will be sent to the author, whose address should be indicated on the MS. If further proofs are required, owing to corrections or alterations for which

*[Continued on page iii of Cover.]*

the printer is not responsible, the expense of such proofs and corrections will be charged against the author.

All proofs must, if possible, be returned within one week, addressed to *The Secretary, Royal Society, Mound, Edinburgh*, and *not to the printer*. To prevent delay, authors residing abroad should appoint some one residing in this country to correct their proofs.

4. ADDITIONS TO A PAPER after it has been finally handed in for publication, if accepted by the Council, will be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

5. BRIEF ABSTRACTS OF TRANSACTIONS PAPERS will be published in the Proceedings, provided they are sent along with the original paper.

6. SEPARATE ISSUE OF REPRINTS; AUTHOR'S FREE AND ADDITIONAL COPIES.—As soon as the final revise of a Transactions paper has been returned, or as soon as the sheet in which the last part of a Proceedings paper appears is ready for press, a certain number of separate copies or reprints, in covers bearing the title of the paper and the name of the author, are printed off and placed on sale. The date of such separate publication will be printed on each paper.

The author receives fifty of these reprints free, and may have any reasonable number of additional copies at a fixed scale of prices which will be furnished by the printer, who will charge him with the cost. To prevent disappointment, especially if the paper contains plates, the author should, immediately after receiving his first proof, notify *to the printer* the number of additional copies required.

7. INDEX SLIPS.—In order to facilitate the compilation of Subject Indices, and to secure that due attention to the important points in a paper shall be given in General Catalogues of Scientific Literature and in Abstracts by Periodicals, every author is requested to return to the Secretary, along with his final proof, a brief index (on the model given below), of the points in it which he considers new or important. These indices will be edited by the Secretary, and incorporated in Separate Index Slips, to be issued with each part of the Proceedings and Transactions.

#### MODEL INDEX.

NO.		PAGE
XXIII.	On the Cohesion of Steel, and on the Relation between the Yield Points in Tension and in Compression. By G. H. GULLIVER, B.Sc., A.M.I.Mech.E., Lecturer in Engineering in the University of Edinburgh, . . . . .	374
	<i>(Issued separately July 20, 1908.)</i>	
XXIV.	The Electromotive Force of Iodine Concentration Cells in Water and Alcohol. By A. P. LAURIE, M.A., D.Sc., Principal of the Heriot-Watt College, Edinburgh, . . . . .	382
	<i>(Issued separately July 22, 1908.)</i>	
XXV.	Inversion Temperatures, and the Form of the Equation of State. By Professor W. PEDDIE, . . . . .	394
	<i>(Issued separately July 22, 1908.)</i>	
XXVI.	Treatment of Aneurysm by Electrolysis. By Dr DAWSON TURNER, . . . . .	400
	<i>(Issued separately July 23, 1908.)</i>	
XXVII.	Experiments with Heusler's Magnetic Alloy. By JAMES G. GRAY, B.Sc., Lecturer on Physics in the University of Glasgow. ( <i>Communicated by Professor A. GRAY, F.R.S.</i> ), . . . . .	403
	<i>(Issued separately July 23, 1908.)</i>	
XXVIII.	The Theory of Hessians in the Historical Order of Development up to 1860. By THOMAS MUIR, LL.D., . . . . .	413
	<i>(Issued separately July 23, 1908.)</i>	

---

*The Papers published in this Part of the PROCEEDINGS may be had separately, on application to the Publishers, at the following prices:—*

No. XIX., . . . . .	Price 10d.
No. XX., . . . . .	1s. 2d.
No. XXI., . . . . .	10d.
No. XXII., . . . . .	6d.
No. XXIII., . . . . .	6d.
No. XXIV., . . . . .	8d.
No. XXV., . . . . .	6d.
No. XXVI., . . . . .	6d.
No. XXVII., . . . . .	8d.
No. XXVIII., . . . . .	1s. 2d.
